

Policy of sustainability

18 August 2011, Riga

Latvijas Finieris is well aware of the environmental, social and economic interests of all stakeholders, balancing them together creates a platform for company's sustainable activities. The sustainability principles of Latvijas Finieris are a proof of the attitude towards customers, employees, cooperation partners, shareholders and society: to work, to earn and to use natural resources responsibly.

Latvijas Finieris principles of sustainability:

- ✓ To take care of environment using environment friendly management principles
- ✓ To stimulate sustainable and efficient use of natural resources
- ✓ To ensure that production of products and offered services are human and environment safe
- ✓ To provide safe and encouraging working environment and fair and motivating remuneration
- ✓ To develop human potential respecting everyone's abilities and providing appropriate training
- ✓ To guarantee proper information handling
- ✓ To respect society's viewpoint and promote mutual understanding through continuous dialogue
- ✓ To educate society and raise interest in Latvijas Finieris and forest sector in Baltic region
- ✓ To implement competitive business activities and increase value of shareholders capital
- ✓ To create balanced return on capital and adequate profit

Latvijas Finieris sustainability policy supports fulfilment of its mission – to enable customers, forest owners, cooperation partners and employees of the company to develop long term partnership.
