

## Energy Policy

Riga, October 19, 2015

Energy efficiency and energy conservation is an integral part of business strategy of Latvijas Finieris.

Being aware of the energy efficiency opportunities, Latvijas Finieris is focusing on a balanced and rational supply of energy resources, as well as on increasing the share of own renewable energy in the total energy mix, making the best use of the resources available, and therefore commits itself to:

- Implement organisational measures and make targeted and economically justified investments, as well as implement the energy performance improvement projects aimed at raising the level of energy efficiency at the company.
- Monitor energy resources and energy consumption in the most important production processes, identifying opportunities for energy saving and cost reduction.
- Assess energy efficiency characteristics of products upon procurement to reduce energy consumption of the company.
- Ensure implementation of energy efficiency measures required by the European and National legislation.
- Continually educate company employees on energy efficiency issues.

The mission of Energy Policy is to make good use of energy resources with the aim of reducing energy consumption per unit of output as well as increasing the share of energy obtained from renewable sources.
